23 Nov 2016

[OPEN](#)

- Bug fixes and minor enhancements

If our app helps you manage your finances, please post a review to let other customers know.

## Available Updates

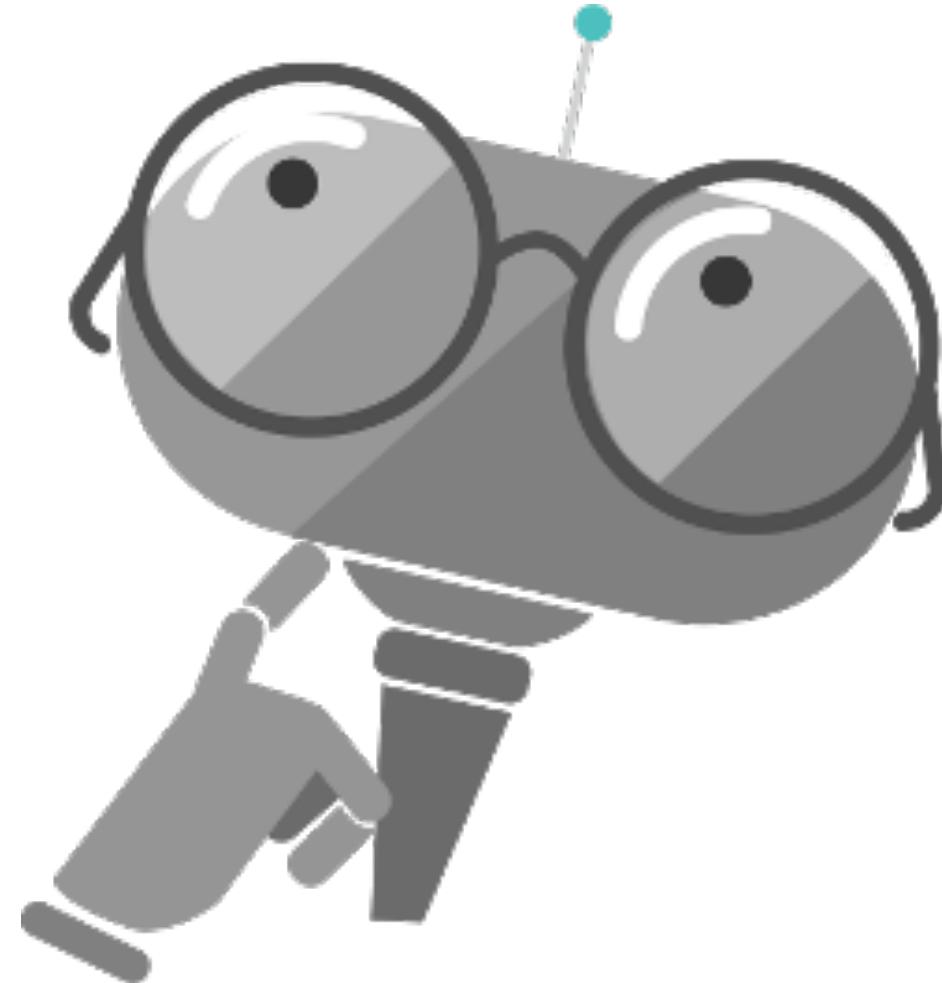

Version 6.67, 85.5 MB  
28 Nov 2016

[UPDATE](#)

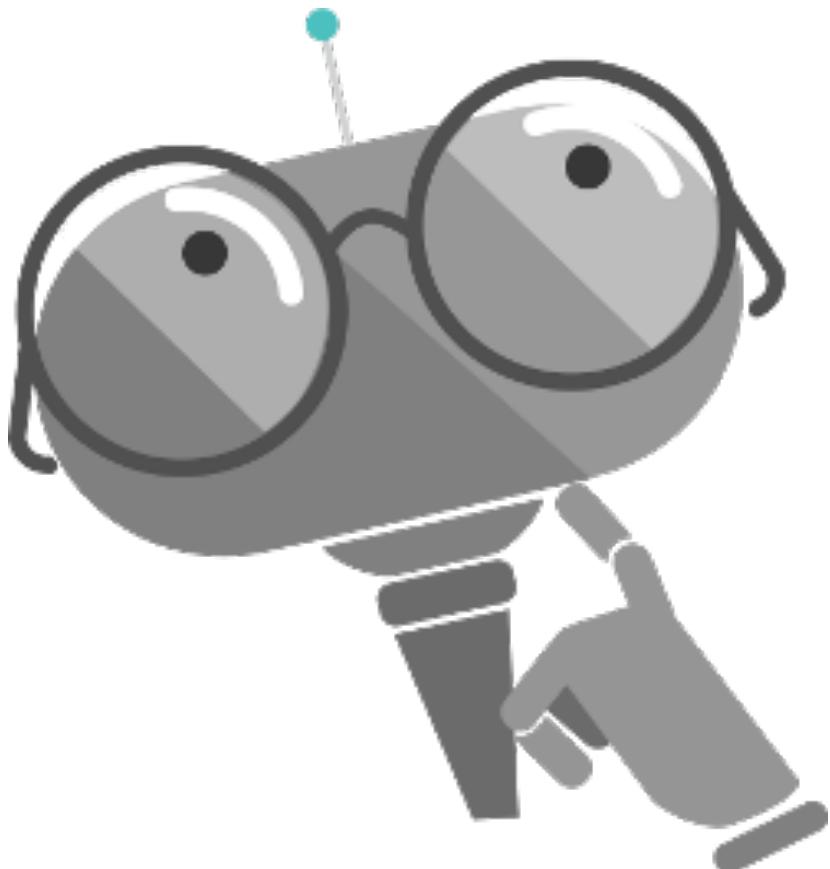

A few minor updates to make Twitter an even better place.

# ¿Qué es un bot?

# ¿Qué NO es un bot?

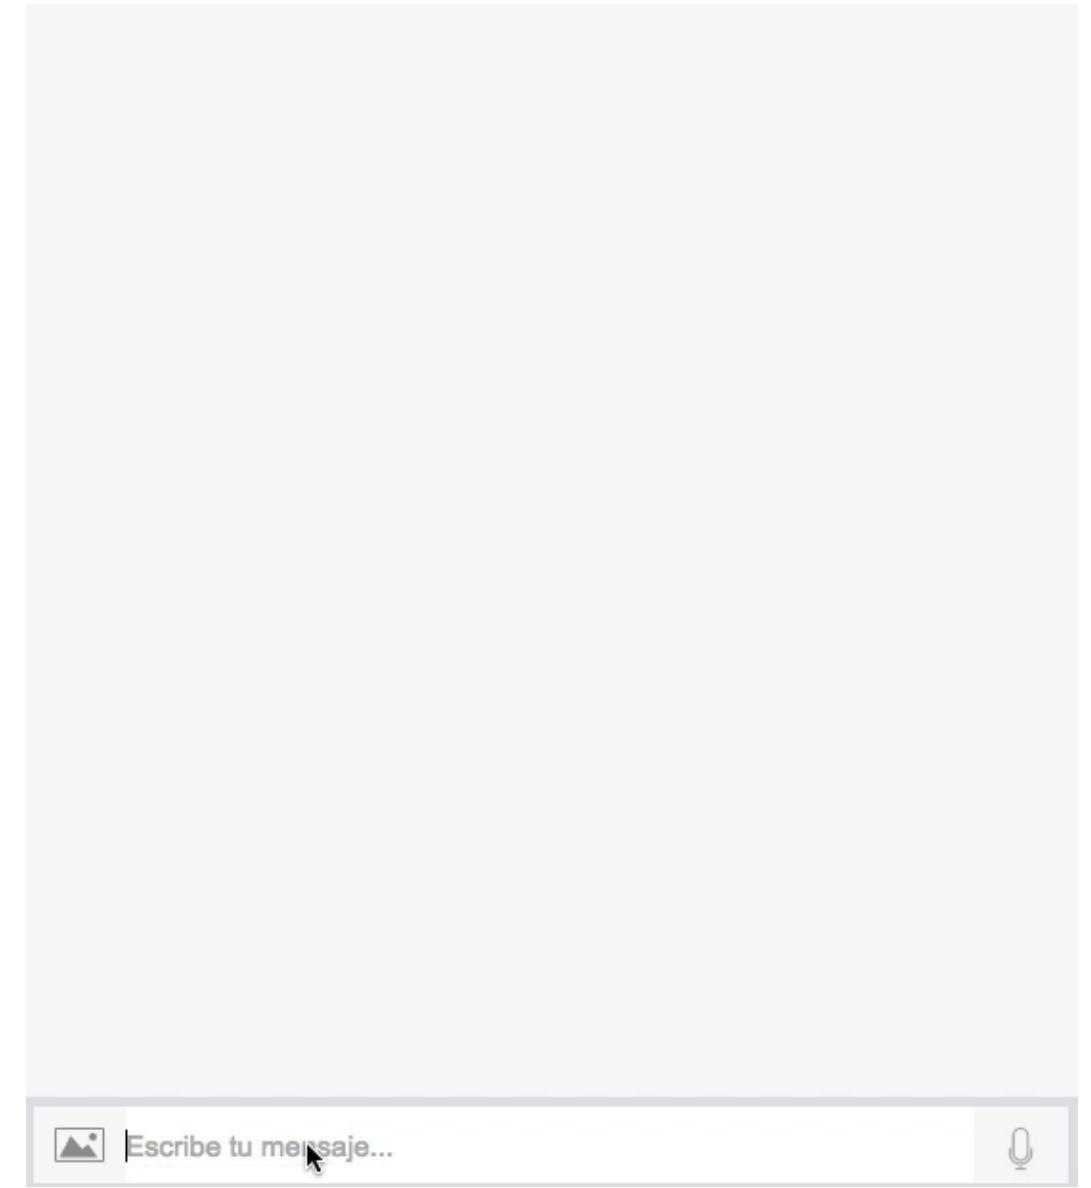

No es BOT ni BoT, es bot!

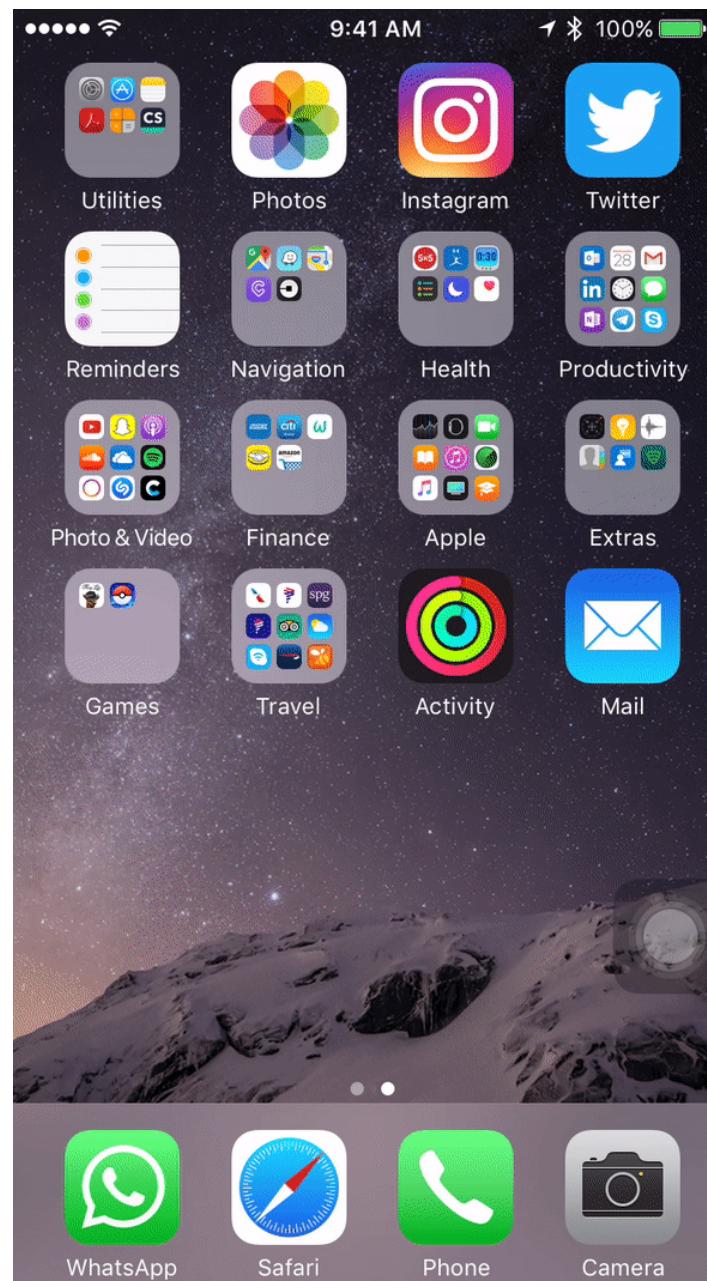

No es Inteligencia Artificial

No es sólo texto

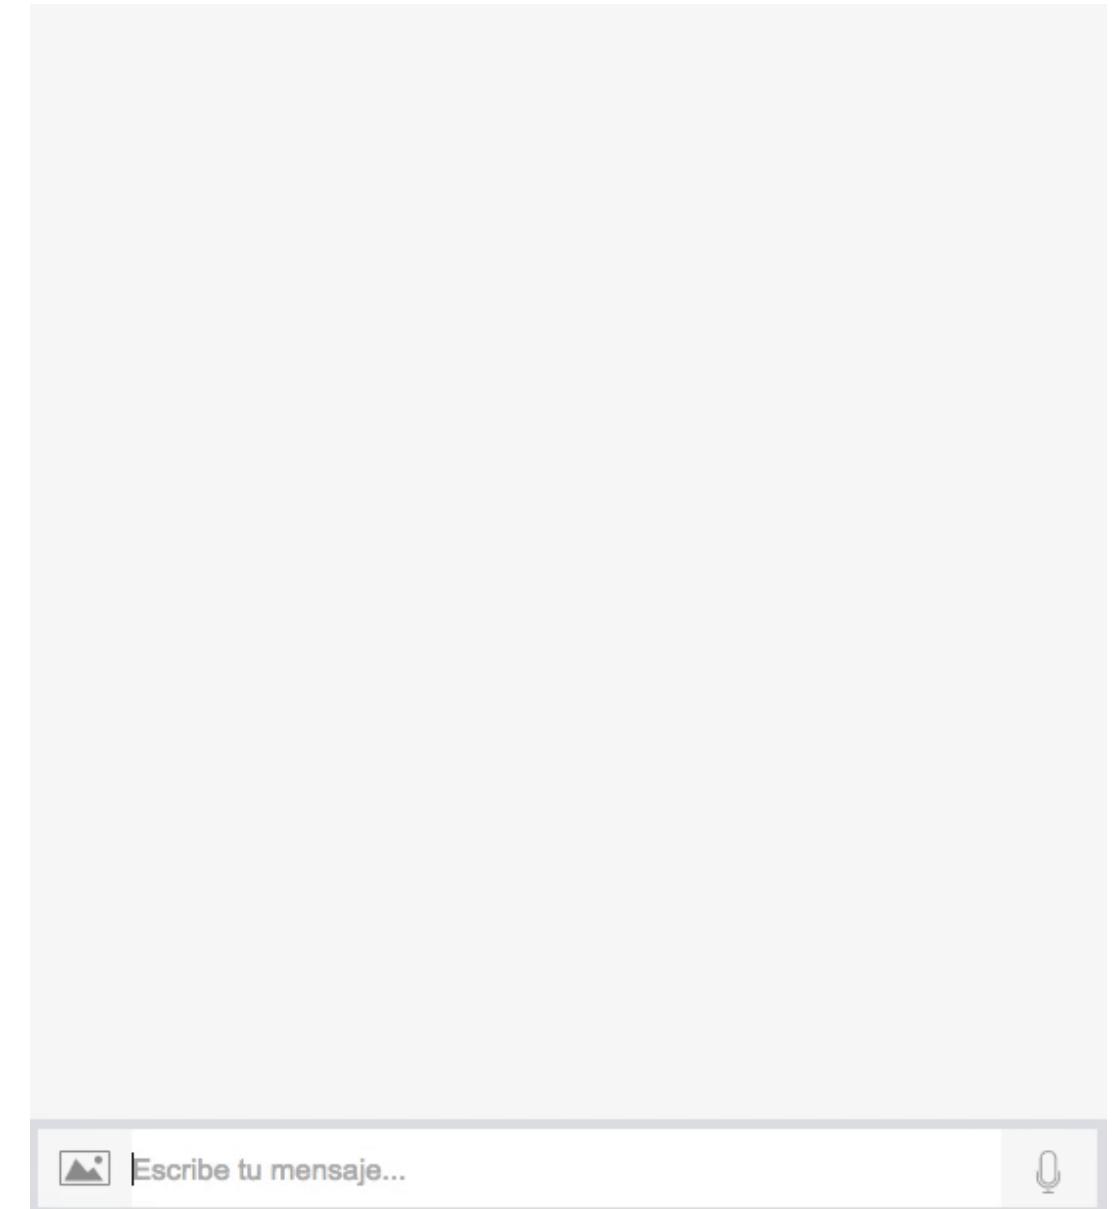

Ejemplo de un bot  
que *no quiero usar*

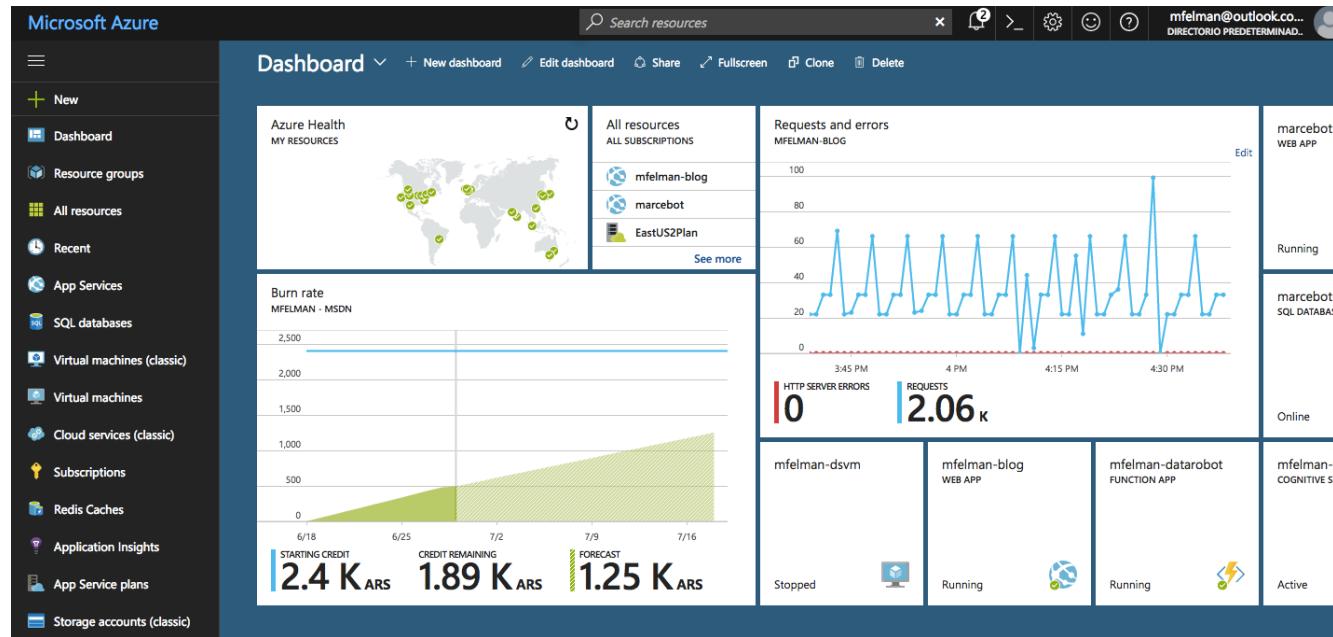

# Ejemplo: alarma

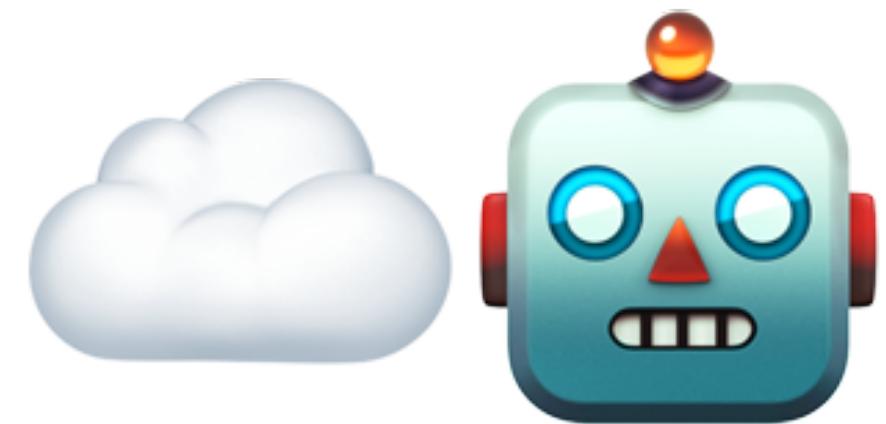

# Ejemplo de un bot que *la rompe*

# Azure Bot

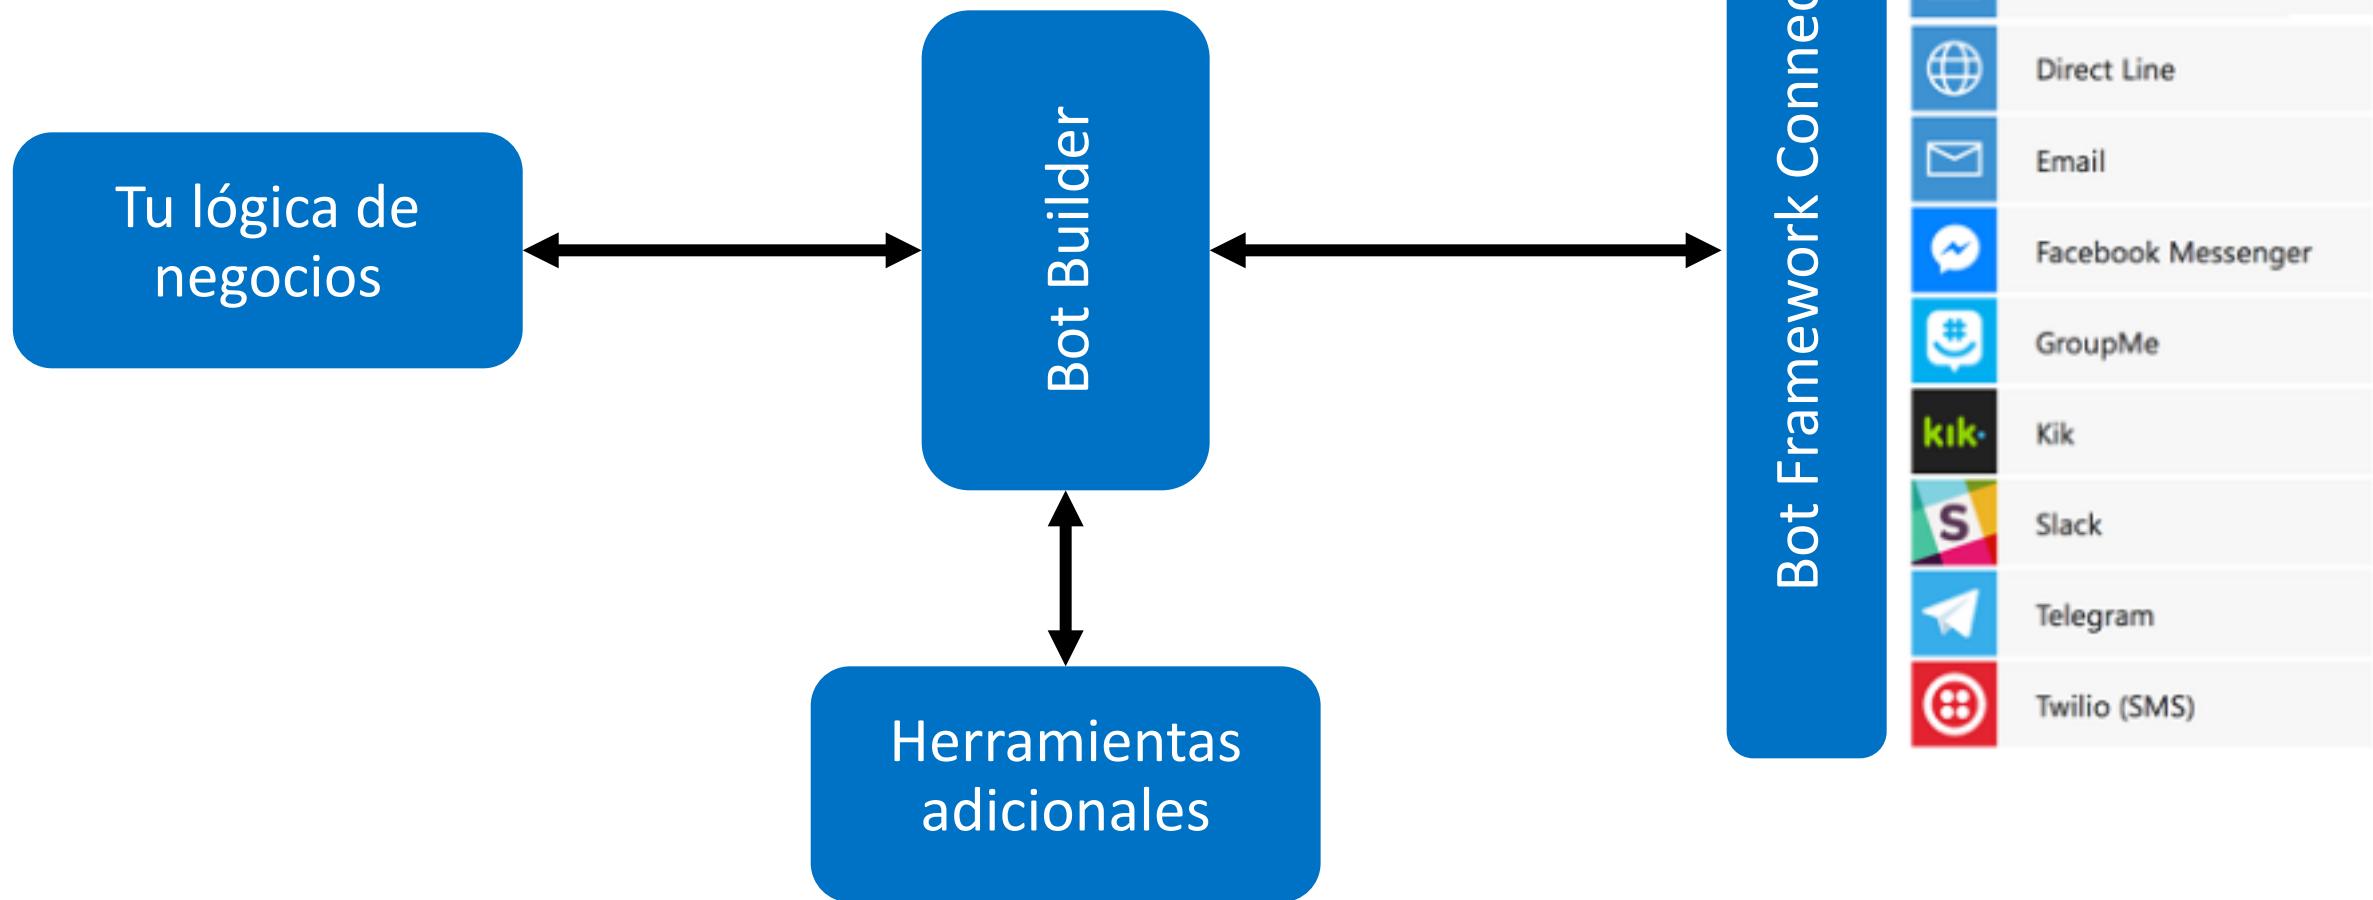

The screenshot shows the Microsoft Azure Dashboard. On the left, a sidebar lists various Azure services: Dashboard, Resource groups, All resources, Recent, App Services, SQL databases, Virtual machines (classic), Virtual machines, Cloud services (classic), Subscriptions, Redis Caches, Application Insights, App Service plans, and Storage accounts (classic). The main dashboard area displays several cards: 'Azure Health MY RESOURCES' with a world map showing resource locations; 'Burn rate MFELMAN - MSDN' with a line chart showing a steady increase in burn rate from 6/18 to 7/16; 'All resources ALL SUBSCRIPTIONS' listing 'mfelman-blog', 'marcebot', and 'EastUS2Plan'; 'Requests and errors MFELMAN-BLOG' showing a line graph of requests and errors over time, with a peak at 4:30 PM; and a list of services including 'mfelman-dsvm' (Stopped), 'mfelman-blog' (Running), 'mfelman-datarobot' (Running), and 'mfelman-visi' (Active). The top navigation bar includes 'Search resources', 'Edit dashboard', 'Share', 'Fullscreen', 'Clone', and 'Delete' buttons, along with a user profile icon.
